the software for management systems

all from one hand

qualitypoint.works

intelligent • organized • solution-oriented

Dolphins are highly intelligent beings with self-awareness, personality and empathy living in highly complex social associations. They use tools, give themselves individual names and develop their own culture. Their success is based on organizational ability, speed, intelligence and strong social behavior. A reason to use the

Del-phin as a natural role model for our company. The individual management consulting paired with the innovative software solution of quality-point helps to optimize your organizational and administrative processes, creates transparency and shortens your path to the successful certification of your management system.

fast

in just 3 days to your digital management system

Ready for use in 3 working days. The quality management software from qualitypoint can be quickly and optimally integrated into your existing system. Your current system will be optimally implemented digital.

easy

all modules in one software

No unnecessary bureaucracy. Your Office documents can be seamlessly integrated into the system. You do not have to leave your existing format.

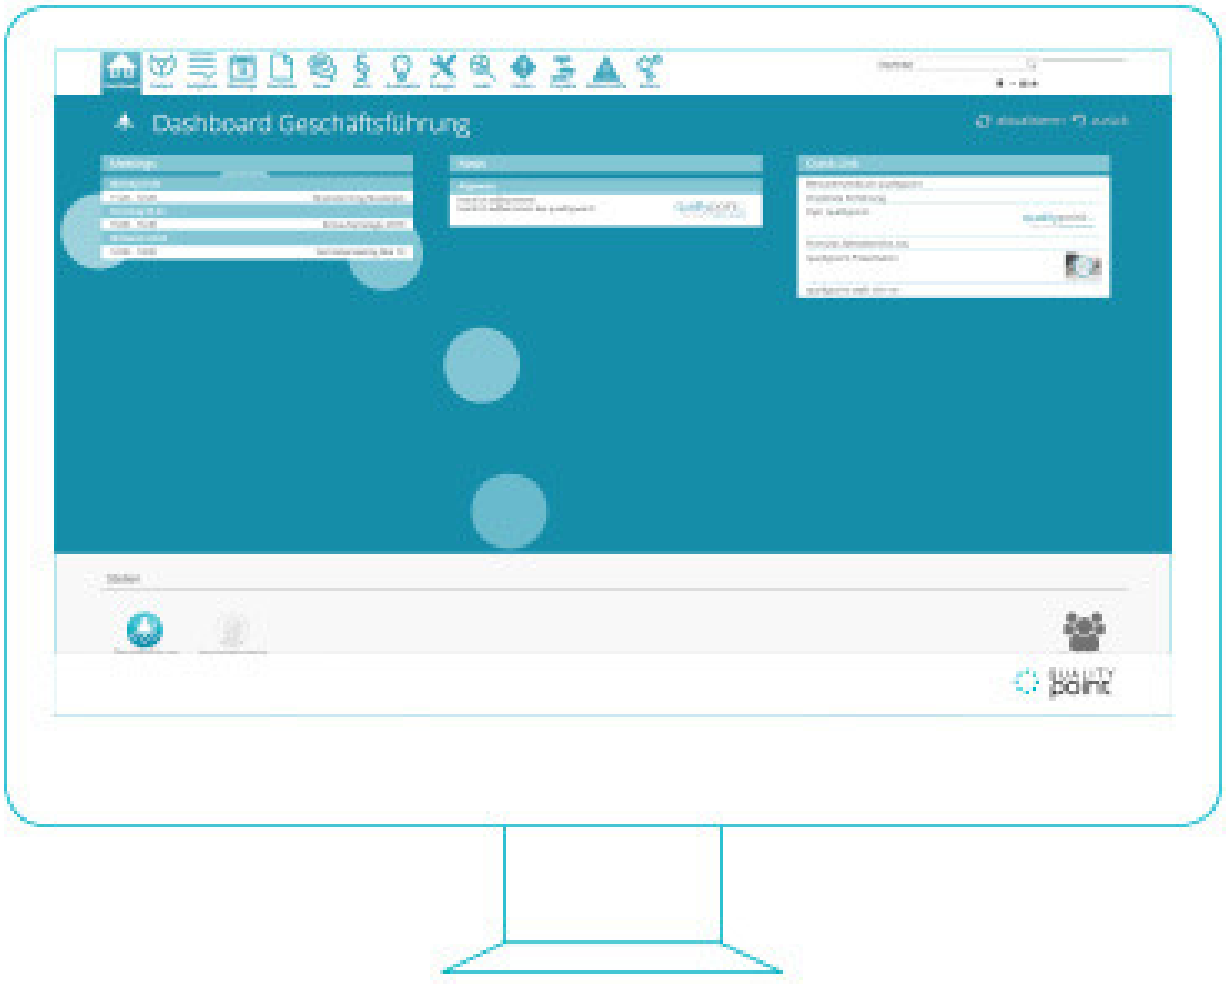
efficient

simple self-explanatory operation

qualitypoint has been developed in application as well as in pricing specifically for small and medium sized companies.

info

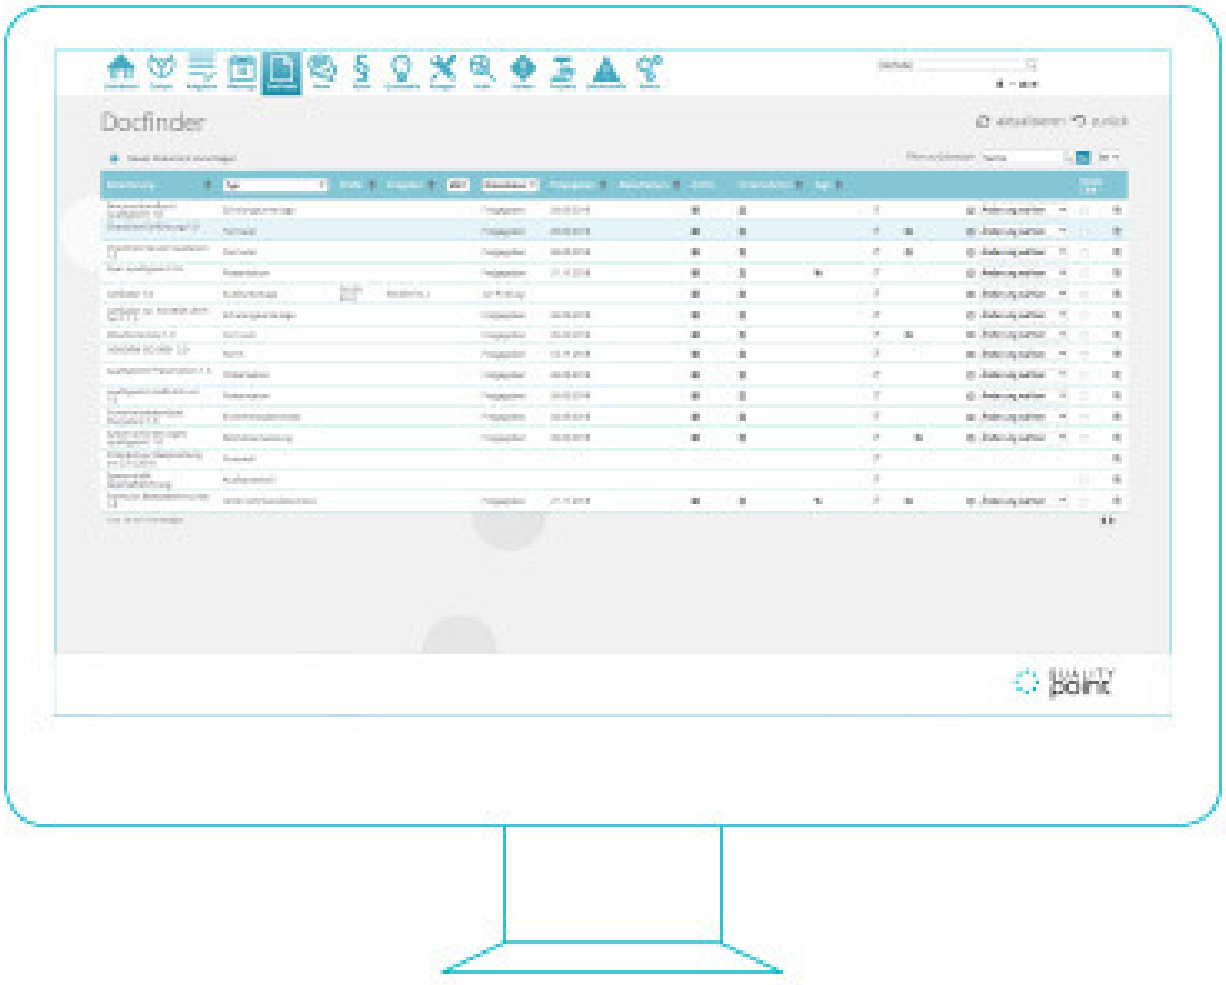
No matter if news, appointments, tasks or new documents. The info tool summarizes all important information for you comfortably. Here you will find all due tasks and appointments at a glance. Likewise, information on legal issues can be accessed quickly and clearly by means of interfaces to our legal compliance tool.



- all important information at a glance
- information about legal issues in one click
- direct interface to the legal compliance tool

document management

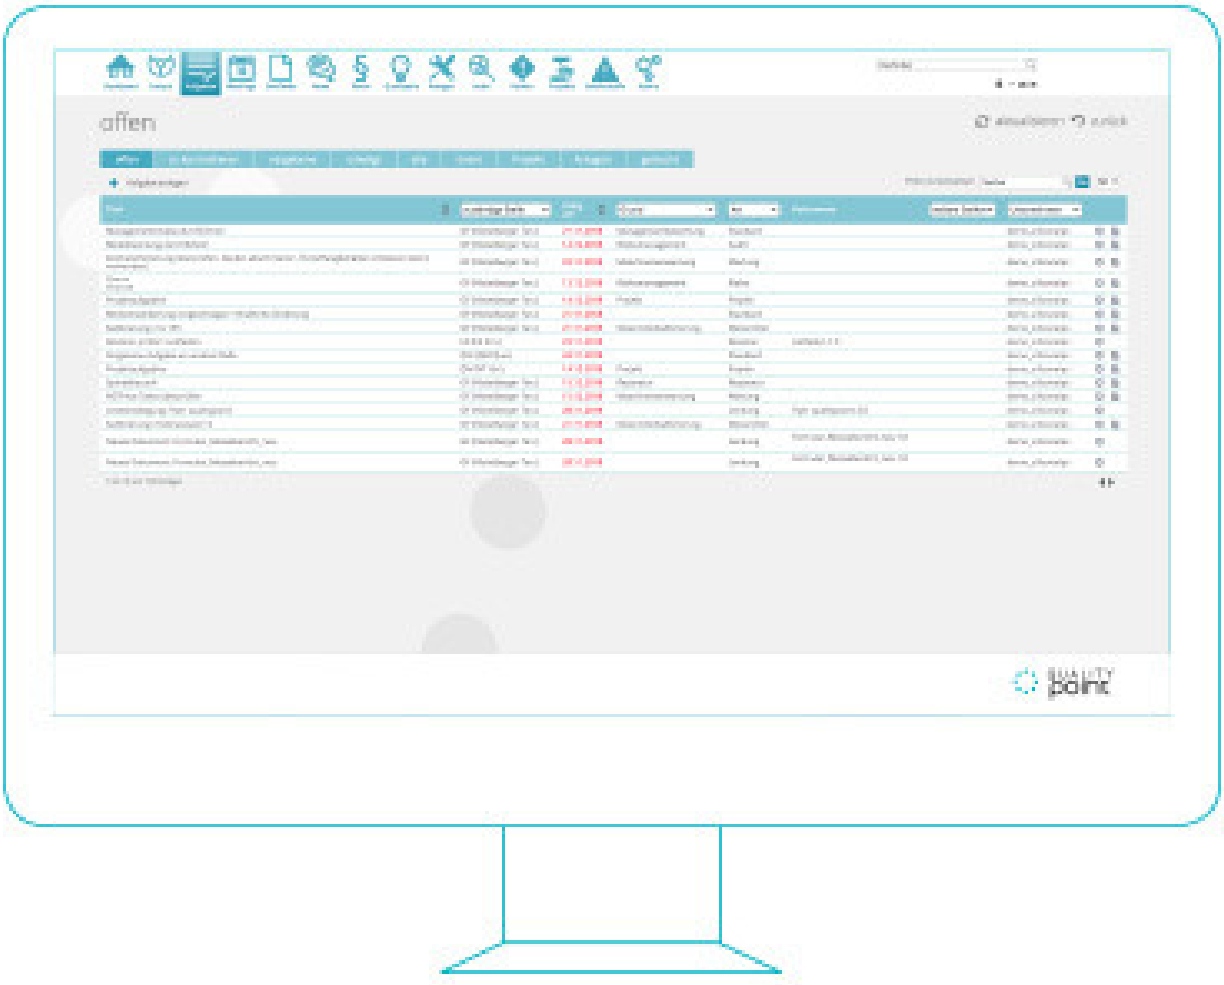
Create, Review, Share - The system easily guides you through the use of an email-based document workflow to publish your documents. Revisions are automatically numbered and changes can be viewed directly in the tasks. In addition to the multiple selection of examiners and approvers, the system also takes holidays and sick leave into account thanks to the integrated substitution system.



- e-mail based document workflow
- create, review, and share in just a few steps
- publication of documents by read receipt

task management

Tasks open or done? The task management ensures order. Whether your own tasks, those of your employees, partners or suppliers - with the overview of tasks you create transparency and maintain an overview. Standard, series, event and project tasks. All tools interact with task management. This allows tasks to be generated quickly and easily automatically.



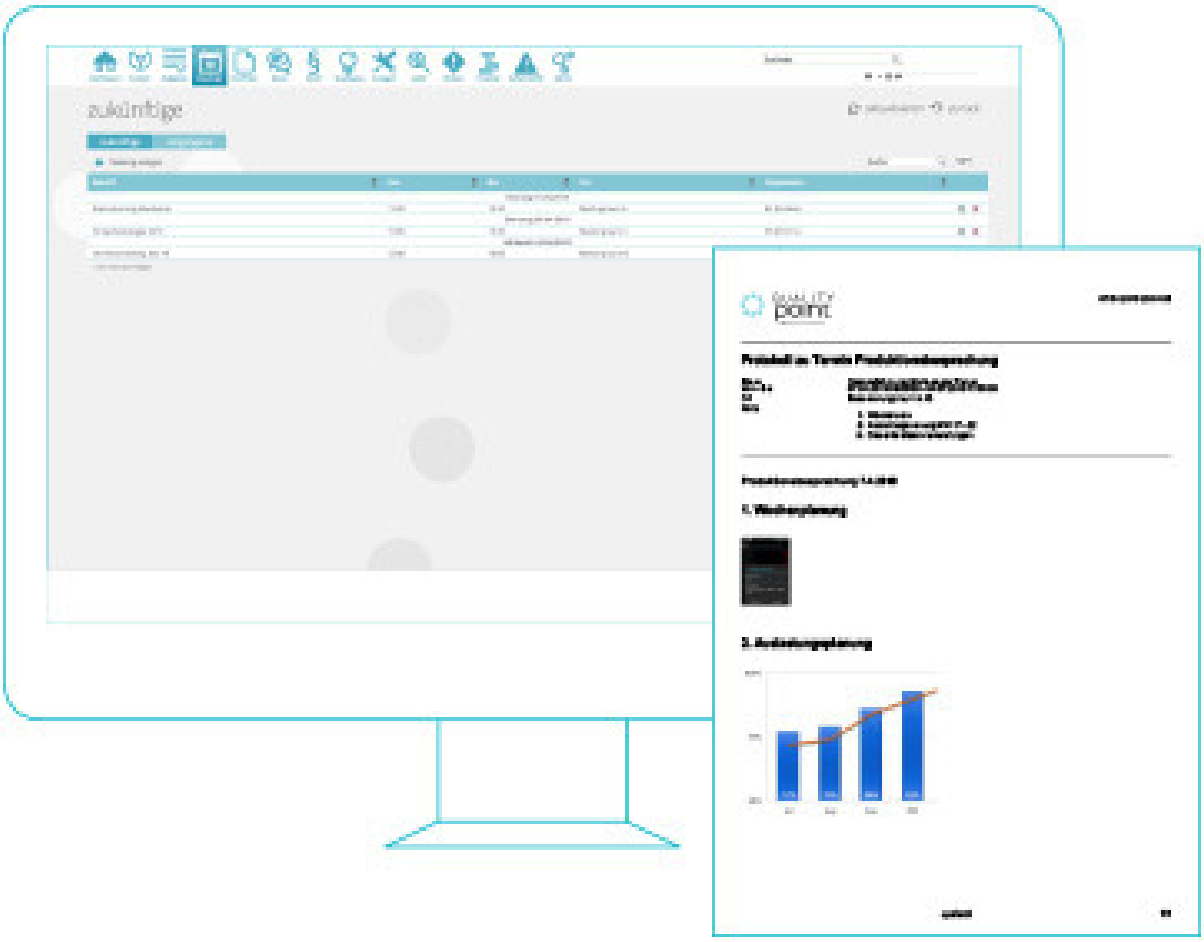
all tasks at a glance

guarantees transparency and overview

generating tasks automatically

meetings

With this tool, you can quickly and easily send appointment invitations and conveniently create meeting minutes directly from the system. Other features include inviting internal and external people, creating and directly distributing logs, and generating tasks directly from the meeting tool.



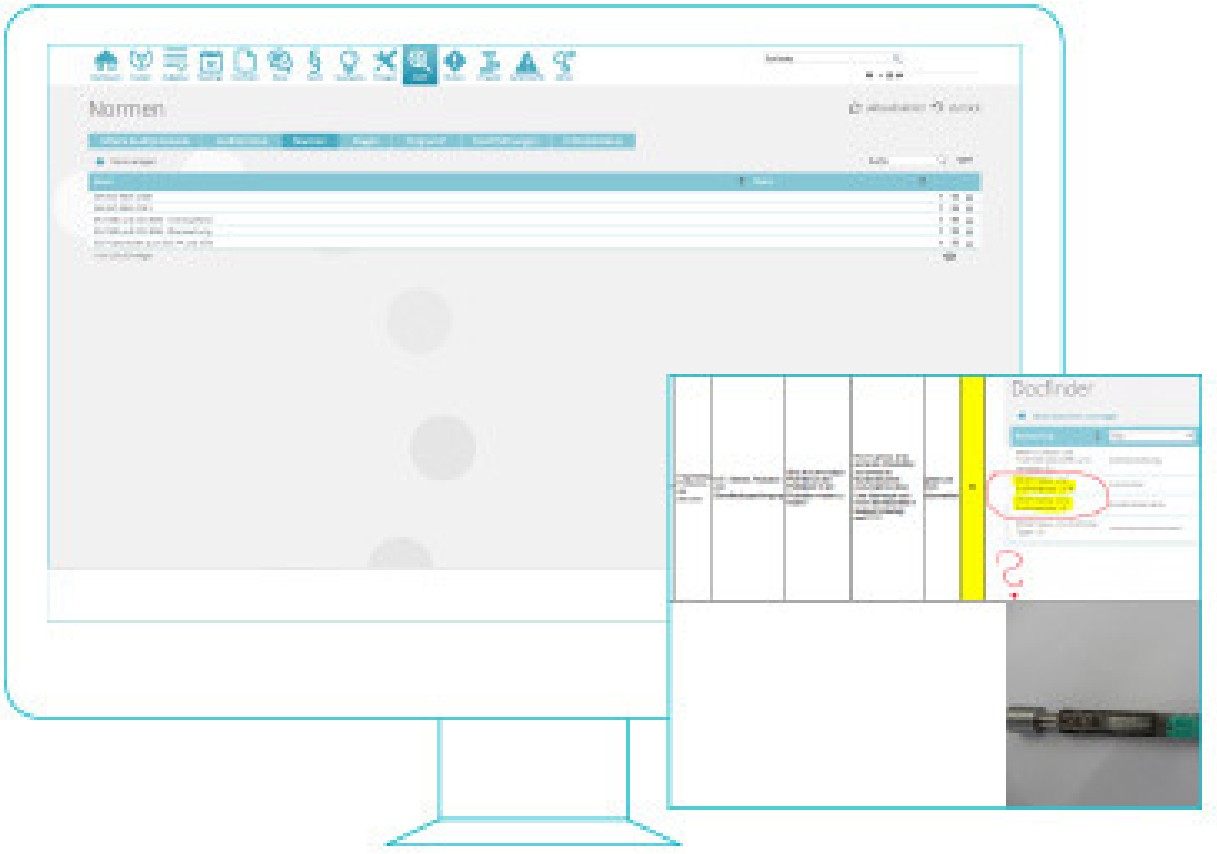
create meetings in just a few clicks

sending invitations and logs

the meeting tool will not let you forget anything

audit

The multifunctional audit tool developed for your planning extends from planning, scheduling and execution to logging including action planning and tracking. Easily create multimedia audit logs, including screenshots and photos, and send them as a PDF via e-mail.



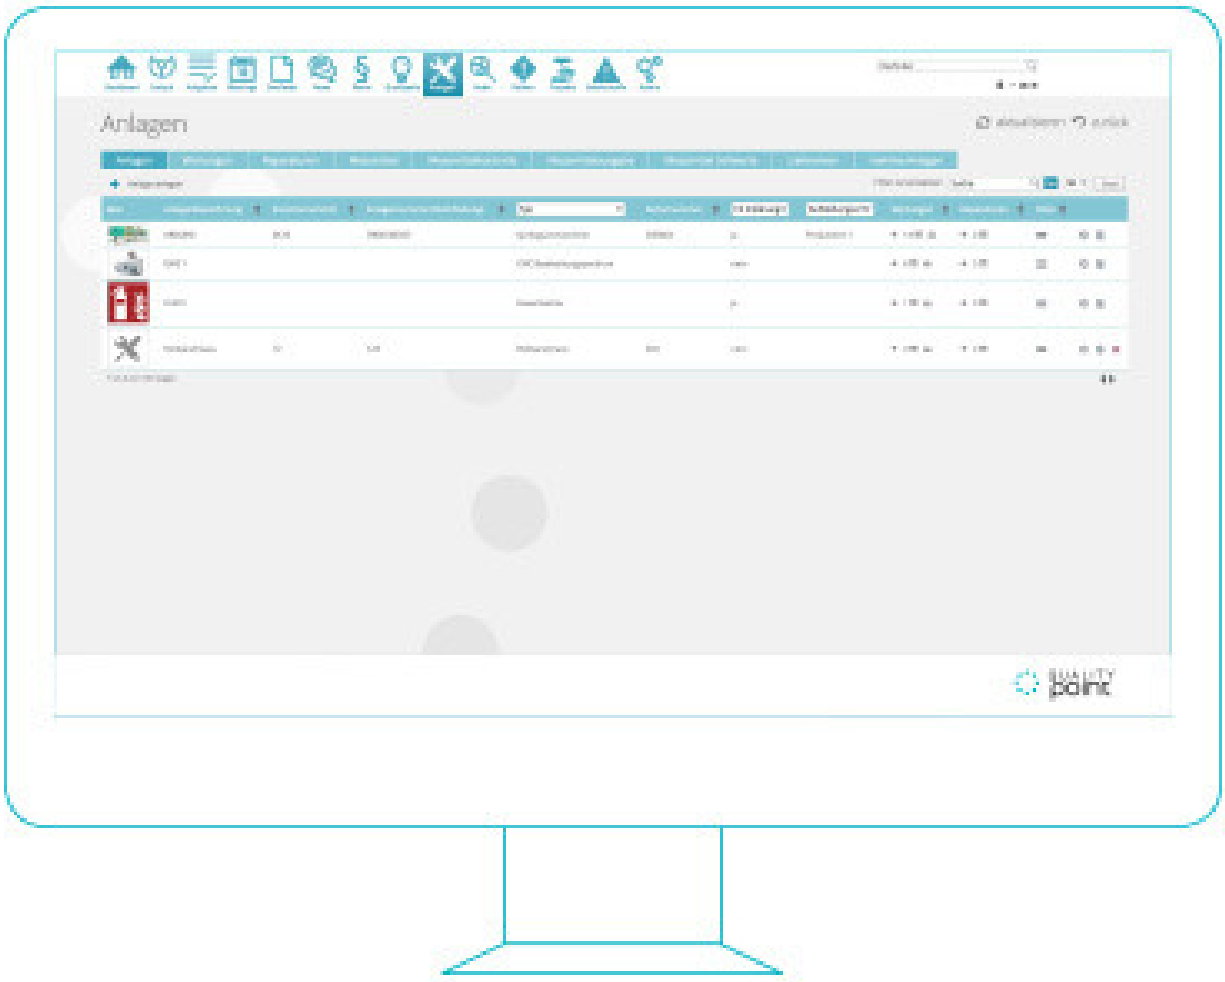
specially developed audit tool from plann to logging

easy creation of multimedia audit logs

convenient integration of screenshots and photos

maintenance / measuring equipment

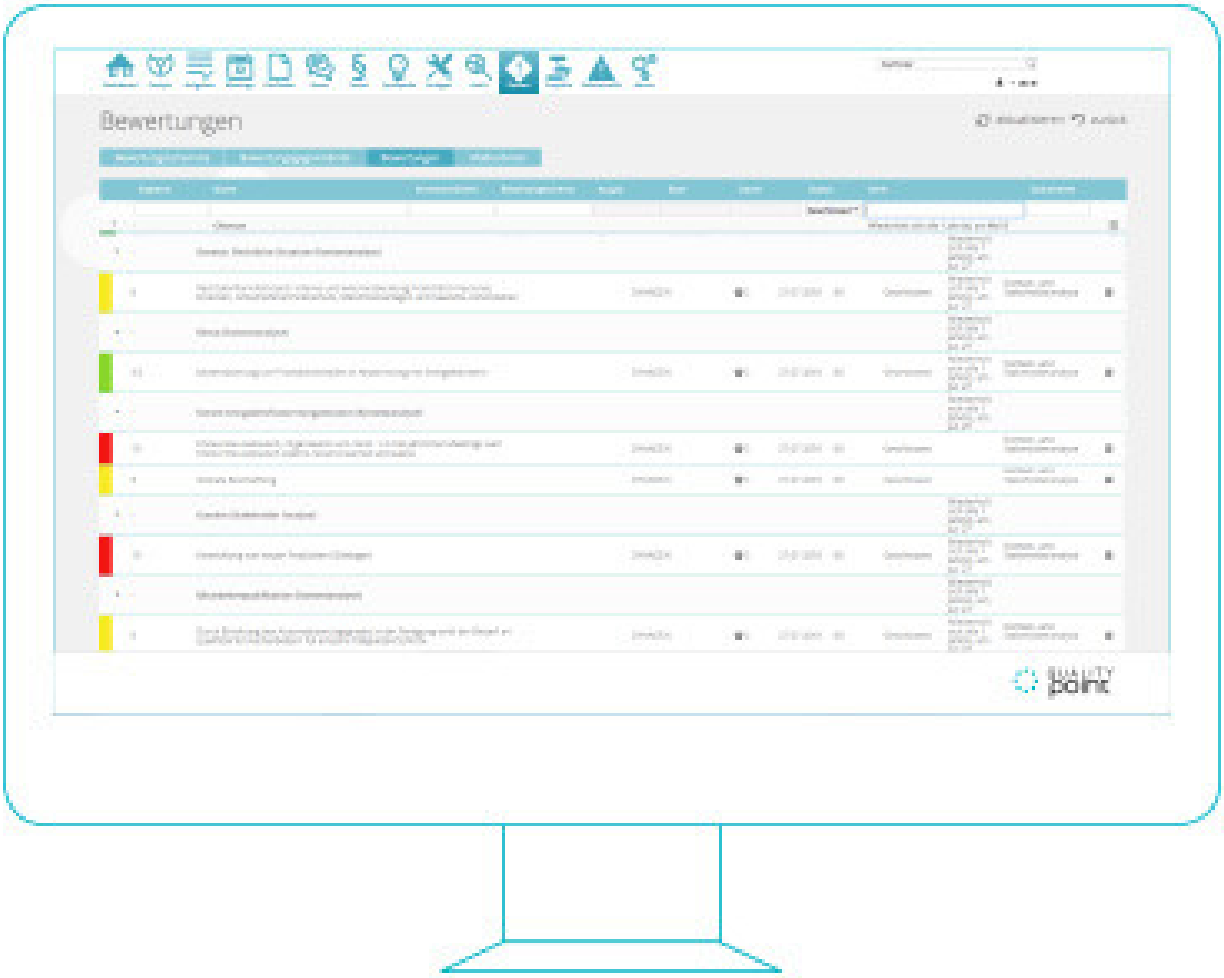
Manage systems and measuring equipment, keep track of maintenance and repairs, be reminded to due internal and external checks. By linking the given obligations with the plant permit, you always keep your legal requirements in mind.



- simple overview of maintenance and repairs
- no surprises regarding duties and obligations
- convenient management of equipment and measuring equipment

opportunities / risks

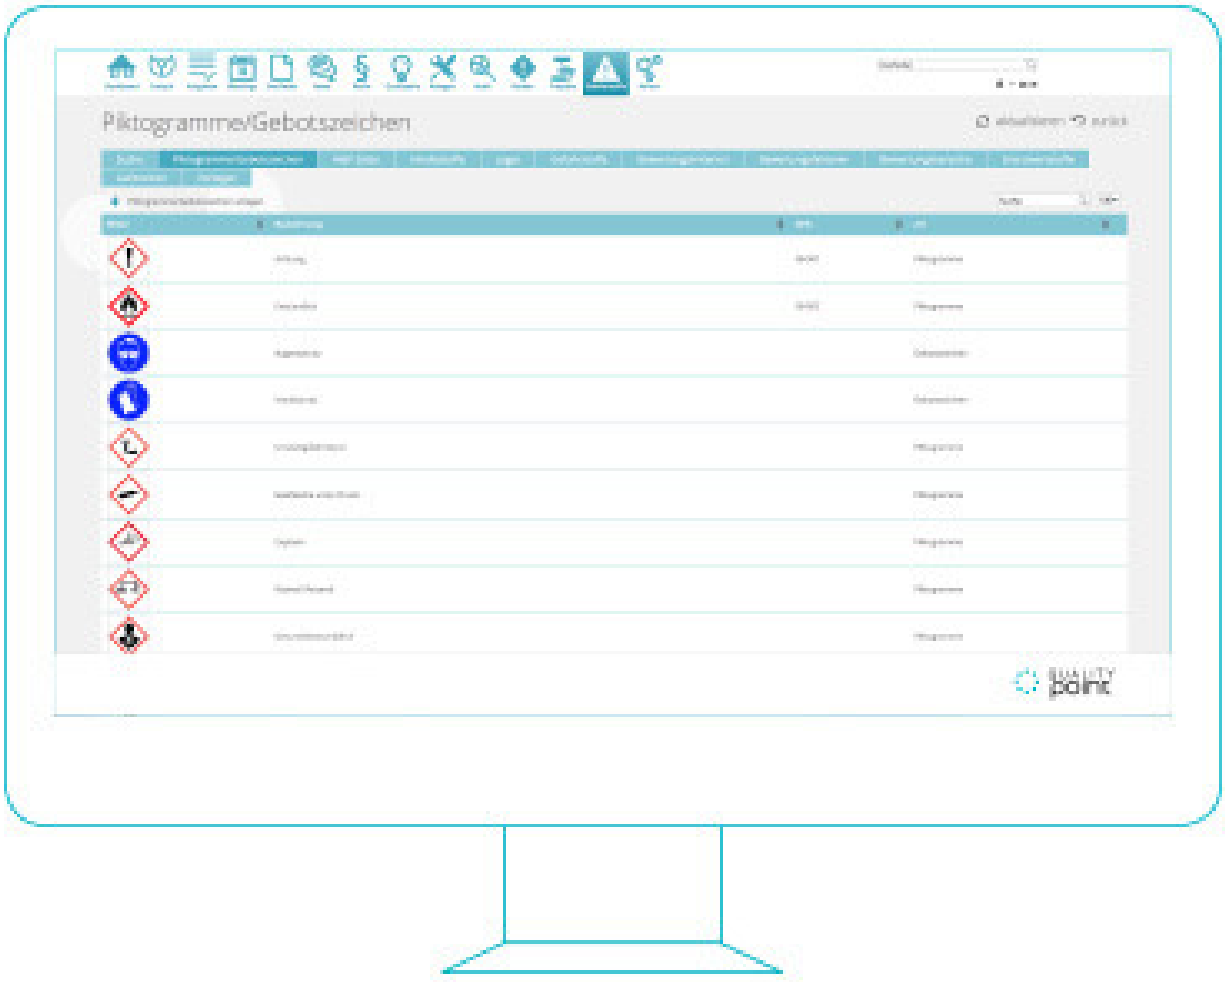
Opportunities, risks and measures: With the risk assessment you cover all evaluation areas perfectly, from the standard FMEA to the environmental aspect assessment and the HACCP hazard analysis. Regular evaluations and measures in the PDCA cycle help you to make your chances and risks transparent and under control.



- structure of individual risk assessments
- cover of all hazard analyzes
- regular evaluations and measures in the PDCA cycle

hazardous materials

Evaluate hazardous substances and create operating instructions by means of stored H & P phrases, pictograms and mandatory signs. Create warehouses and suppliers without any problems. Edit shared information centrally in the templates and save valuable time!



simple evaluation of hazardous substances

preparation of operating instructions in just a few steps

Convenient integration of pictograms and mandatory signs

We accompany ISO systems.

Quality management according to ISO 9001 and other standards is essential nowadays. We have set ourselves the task of giving our customers valuable time for value-added processes. The software is operational within 3 days and offers modular functions such as measuring device monitoring, an audit tool, risk management or the management of training certificates. As an ISO-certified company, we are in a very good position to combine the requirements of the management systems with the operational practice in the company. Modern quality management systems such as ISO 9001, 14001, 27001, 18001, 22001, 50001 are efficiently digitized and simplified. This software greatly simplifies preparation for certification and recertification of these standards, and is cost-effective for small businesses in particular. These management systems help you with organizational development (simplification of processes), deadline tracking, operational legal certainty and are perfectly suited for project and complaint handling.

80

Already 80 satisfied customers in Germany and abroad rely on our software management system.

Awarded the 1st place of the Constantinus Award 2018
